

Dispositivo de exibição gráfica, facilitando interação do usuário

Disco rígido que grava e lê dados, oferecendo espaço para o sistema operacional e arquivos

Permite inserir dados e comandos no computador por meio de teclas

Disco rígido que grava e lê dados, oferecendo espaço para o sistema operacional e arquivos

Permite inserir dados e comandos no computador por meio de teclas

Apontador que permite navegar e executar comandos no computador.

Permite inserir dados e comandos no computador por meio de **teclas**

**Apontador que** permite navegar e executar comandos no computador.

Dispositivo de **exibição** gráfica, facilitando interação do usuário

**Apontador que** permite navegar e executar comandos no computador.

Dispositivo de **exibição** gráfica, facilitando interação do usuário

**Disco rígido** que grava e lê dados, oferecendo espaço para o sistema operacional e arquivos

Dispositivo de exibição gráfica, facilitando interação do usuário

Processador gráfico e de imagens, acelerando tarefas como renderização de vídeos e jogos.

Processador gráfico e de imagens, acelerando tarefas como renderização de vídeos e jogos.

Hardware que integra todos os dispositivos do computador.

Hardware que integra todos os dispositivos do computador.

Disco rígido que grava e lê dados, oferecendo espaço para o sistema operacional e arquivos

Hardware que  
**integra** todos os  
dispositivos do  
computador.

Processador gráfico  
e de imagens,  
acelerando tarefas  
como **renderização**  
de vídeos e jogos.

Hardware que  
**integra** todos os  
dispositivos do  
computador.

Dispositivo de  
armazenamento  
**flash** que lê e grava  
dados, oferecendo  
espaço para o  
sistema operacional  
e arquivos.

Processador gráfico  
e de imagens,  
acelerando tarefas  
como **renderização**  
de vídeos e jogos.

Dispositivo de  
armazenamento  
**flash** que lê e grava  
dados, oferecendo  
espaço para o  
sistema operacional  
e arquivos.

Componente responsável por interpretar e executar **instruções**, controlando os **processos** do sistema.

Armazena e **permite o randômico** de dados e instruções em uso, permitindo acesso rápido pelo processador

Recurso para **pré-carregar** dados e instruções frequentemente usados, acelerando o desempenho.

Dispositivo de armazenamento **flash** que lê e grava dados, oferecendo espaço para o sistema operacional e arquivos.

Dispositivo de armazenamento **flash** que lê e grava dados, oferecendo espaço para o sistema operacional e arquivos.

**Disco rígido** que grava e lê dados, oferecendo espaço para o sistema operacional e arquivos

Recurso para **pré-carregar** dados e instruções frequentemente usados, acelerando o desempenho.

Componente responsável por interpretar e executar **instruções**, controlando os **processos** do sistema.

Recurso para **pré-carregar** dados e instruções frequentemente usados, acelerando o desempenho.

Armazenamento **randômico** de dados e instruções em uso, permitindo acesso rápido pelo processador

**Apontador** que permite navegar e executar comandos no computador.

Componente responsável por interpretar e executar **instruções**, controlando os **processos** do sistema.

**Recurso para pré-carregar dados e instruções frequentemente usados, acelerando o desempenho.**

**Armazenamento randômico de dados e instruções em uso, permitindo acesso rápido pelo processador**

**Permite inserir dados e comandos no computador por meio de teclas**

**Armazenamento randômico de dados e instruções em uso, permitindo acesso rápido pelo processador**

**Componente responsável por interpretar e executar instruções, controlando os processos do sistema.**

Mouse - palavra chave: apontador

SSD - palavra chave: flash

Monitor - palavra chave: exibição

Memória RAM - palavra chave: randômico

CPU - palavra chave: instruções e processos

HDD - palavra chave: disco rígido

Cache - palavra chave: pré-carregar

Teclado - palavra chave: teclas

GPU - palavra chave: renderização

Placa-mãe - palavra chave: integra
